

New York State Covered Bridge Society

6754 Basin Clove Rd.
Hamden, NY 13782-2432

The NYS Covered Bridge Society is offering a one-time \$500 reimbursement for the application of fire retardant on any historic or authentic covered bridge in New York State. In order to be considered for reimbursements please complete the following application. This must be completed prior to the fire retardant treating of the covered bridge.

Every year covered bridges are lost to arson and in order to reduce these losses, the NYS Covered Bridge Society is offering an incentive to encourage bridge owners to apply for this reimbursement. This reimbursement is for historic or authentic bridges and ones that have not previously been treated.

Each application will be considered at a regular Society monthly meeting. The bridge owner must supply documentation in the form of invoices that indicate the retardant has been applied. The reimbursement is for the application process consisting of material and labor costs combined.
